

COLD TOLERANT

HEAT TOLERANT

SHADE TOLERANT

EXCELLENT DENSITY

RAPID ESTABLISH.

QUICK FACTS

TRUE PUTT creeping bluegrass is a new specie in the turf-grass world and an exclusive of DLF International Seeds. It is very adaptable for multiple uses, but where it really shines is on golf greens. Here's what Matt Peltier, Head Superintendent of Springhill Country Club in Albany, Oregon had to say about it:

"**True Putt Creeping Bluegrass** is the most obvious fit for maintaining putting surfaces where Poa Annua is being managed. It's growth habits, putting quality, drought tolerance, and similarity in color of the native Poa Annua make it easily adaptable to an overseeding program as well as a perfect fit for renovation of putting greens. The feedback from golfers and the constant compliments on the density, color, and speed of greens makes True Putt the obvious choice for our putting surfaces."

You'll also find True Putt at the Bend, OR Country Club and the Aubry Glen Country Club in central Oregon.

True Putt

Oregon - Washington

Creeping Bluegrass

- UNIFORM, DENSE TURF
- MEDIUM GREEN COLOR
- SHADE/HEAT TOLERANT
- TOLERATES LOW MOWS
- RAPID ESTABLISHMENT

TRIAL DATA

QUALITY

1997-98 S. Overseeding Trials	
	MEAN
TRUE PUTT	7.94
PARAGON	6.0
CHARGER II	6.38
PREMIER II	6.18
PALMER II	5.0
GATOR II	5.0

University of Florida

SEEDING RATES

New Lawn:

2-3 lbs per 1000 sq ft

Overseeding:

1-2 lbs per 1000 sq ft

Growth Habit	Estab. Rate Days	LHC Tol. to 1/2"	Mowing Frequency	Traffic Tol. (Brinkman)	Thatch Production	Comp. Mix	Nitrogen Required	Shade Tolerance	Cold Tolerance	Drought Tolerance	ET Rate mm/day	Endophyte	Salinity Tol. mmhos
